2012 Yukon River Summer Salmon Fishery News Release #51 **Summer Announcement #45, District 1 Commercial Fishing Period #10** Districts Affected: Lower Yukon Area

The Pilot Station sonar summer chum salmon passage estimate through July 12 is approximately 2 million fish which is above the historical median of 1.3 million fish for this date.

The preliminary commercial harvest in Districts 1 and 2 combined through July 12 is approximately 187,200 summer chum salmon with a reported 2,100 Chinook salmon caught but not sold.

Based on the current abundance of summer chum salmon and the low abundance of Chinook salmon, this announcement opens one commercial salmon fishing period in District 1. The area open to commercial fishing is all of District 1.

District 1 Commercial: Commercial salmon fishing in the entire District 1 area will be open from 6:00 p.m. Friday, July 13, until 12:00 Midnight Friday, July 13. This will be a 6-hour commercial fishing period with gillnets restricted to 6-inch or smaller mesh size to target summer chum salmon.

Once again, all of District 1 is open for commercial fishing during this commercial period.

No Chinook salmon can be sold in any summer chum commercial openings until further notice. Therefore, fishermen can release live Chinook salmon or use them for subsistence purposes. All Chinook salmon caught but not sold must be reported on fish tickets.

Fishermen are reminded that Chinook salmon caught must have both tips of the tail fin removed prior to concealing or removing the fish from the fishing grounds from June 1 to July 15.

Fishermen in Districts 1 and 2 should stand by for short notice news releases on VHF and radio regarding changes to the subsistence salmon fishing schedules or commercial fishing periods in these districts.

Recorded fishery announcements and updates will be available 24 hours a day at 949-1731 or 1-866-479-7387. If you have any questions regarding this report, please call the Emmonak ADF&G office at 949-1320. The Emmonak ADF&G office will stand by on VHF channel 7A.

This has been an announcement by the Alaska Department of Fish and Game in cooperation with the U.S. Fish and Wildlife Service.
